**8th Edition
2001**

compiled by
UNEP-WCMC

The Joint Nature Conservation Committee is the body constituted by the Environmental Protection Act 1990 to be responsible for research and advice on nature conservation at both UK and international levels. It is a committee of the Countryside Council for Wales, English Nature and Scottish Natural Heritage, together with independent members and representatives from the Countryside Commission and Northern Ireland. It is supported by specialist staff.

Prepared under contract from the Joint Nature Conservation Committee by **UNEP-WCMC**. The UNEP World Conservation Monitoring Centre was established in 2000 as the world biodiversity information and assessment centre of the United Nations Environment Programme. The roots of the organization go back to 1979, when it was founded as the IUCN Conservation Monitoring Centre. In 1988 the World Conservation Monitoring Centre was created jointly by IUCN, WWF International and UNEP. The financial support and guidance of these organizations in the Centre's formative years is gratefully acknowledged.

The designations of geographical entities in this report, and the presentation of the material, do not imply the expression of any opinion whatsoever on the part of JNCC or WCMC concerning the legal status of any country, territory, or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Acknowledgements

This checklist was compiled by UNEP-WCMC under contract F90-01-369 from the Joint Nature Conservation Committee.

The volume builds on earlier editions, and the numerous contributors to those editions are acknowledged. UNEP-WCMC staff involved in the production of this volume include Tim Inskipp, Harriet Gillett, Phillip Fox, Jodie Humphreys, Neil Cox, Brian Groombridge and Paul Birrell. The project was supervised by Gerardo Fragoso.

Vin Fleming and Alison Littlewood of the JNCC CITES Unit are thanked for providing advice and guidance throughout.

Introduction

In April 1991, the Nature Conservancy Council for England (English Nature), Countryside Council for Wales and Scottish Natural Heritage acting together through the Joint Nature Conservation Committee were appointed by the Secretary of State for the Environment as the United Kingdom's Scientific Authority for Animals under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). CITES regulates international trade in wild animals and plants and in products derived from them, to help to ensure their conservation on a worldwide scale.

The intention of this work is to provide a combined list of amphibian and reptile species included in Appendices I, II and III of CITES, indicating the current Appendix, the EC Regulation 338/97 Annex, and the IUCN conservation status category.

This revised edition incorporates additions and amendments to the CITES appendices up to and including those made at the 10th Meeting of the Conference of the Parties in Zimbabwe in June 1997 (effective from 18 September 1997).

The IUCN status categories given here are those current at the time of preparation, as represented in the 1996 *IUCN Red List of Threatened Animals* (IUCN, 1996).

For background material on the rationale of the IUCN threat categories, readers are referred to IUCN (1996), for background on the workings of CITES, recommended works are Favre (1989) and Wijnstekers (1992). For information by country on the diversity and status of amphibians, reptiles and other taxonomic groups, and for a general review of biodiversity, readers are referred to WCMC (1992) and WCMC (1994).

In a publication of this nature, it is inevitable that users will discover entries that need correcting or updating. The publishers would be grateful if their attention could be drawn to these entries and the World Conservation Monitoring Centre would be grateful to receive details of such changes so that they can be incorporated in the database from which this publication is derived.

Explanatory notes

Each species is typically represented by a block of text; including scientific name (with alternatives), Common names in the three official CITES languages (where available), geographic range, CITES Appendix, EC Regulation 338/97 Annex, and Red List category. Where a species has component populations or formal subspecies which are treated differently by CITES, the species entry is subdivided appropriately.

Scientific names

Nomenclature follows that used in the CITES Appendices for the forms appearing therein.

For each taxon listed, the scientific name and authority is given first, with alternative names given in parentheses on the following line. In the majority of cases these alternatives are the most frequent synonyms in current use. In a few cases, these are recently proposed taxonomic changes not yet in common use, and in others the scientific name in parentheses is that accepted by taxonomists, but not the name used in the CITES Appendices.

The sequence of families within orders also conforms to the CITES Appendices (thus the amphibian families are in alphabetical order while the reptile families follow a conventional systematic order). The genera and species are in alphabetical order within each family. The primary taxonomic source followed for most of the groups covered is given below; the numerous later changes and additions to these checklists are referenced separately in the relevant species entries.

Amphibians: (Frost, 1985 and Duellman, 1993) adopted by the CITES parties as the standard references to amphibian nomenclature; except for *Mantella* (Vences *et al.*, 1999).

Testudines: Wermuth and Mertens (1996); Iverson (second edition, 1992).

Crocodylia and Rhynchocephalia: Wermuth and Mertens (1996).

Gekkonidae (Wermuth, 1965; Kluge, 1991).

Agamidae (Wermuth, 1967).

Chamaeleonidae (Klaver and Böhme, 1997).

Iguanidae, Phrynosomatidae, Tropiduridae (several sources, see individual entries).

Cordylidae (Wermuth, 1968; Branch, 1998).

Teiidae (several sources, notably Peters and Donoso-Barros, 1970; Avila Pires, 1995).

Helodermatidae and Varanidae (Mertens, 1963).

Boidae, Bolyeriidae, Loxocemidae, Pythonidae, Tropidophiidae (McDiarmid *et al.*, 1999).

Colubridae (several sources, see individual entries).

Elapidae (Klemmer, 1963; Leviton, 1968).

Viperidae (McDiarmid *et al.*, 1999).

Common names

Common names and trade names appear below the scientific names; few of the listed taxa have regularly or universally used common names. In some cases, identical trade names appear to be used for different taxa.

Geographical range

After the scientific and common names of each taxon, the geographical range is given in terms of political units, listed in alphabetical order. In several cases, particularly where islands are concerned, further distribution details are given thus 'Indonesia: Sumatra'. When the name of a country is given as part of the range of a certain species, that species may not occur throughout the country and may even be of only peripheral occurrence.

A question mark '?' in parentheses has been used following a country to indicate that there is some uncertainty in the status of the species in that country.

A country where the species is known to be extinct is denoted by '(ex)', or by '(ex?)' where there is still a small possibility that the species survives.

'[int]' denotes a range state where the species has been introduced. '[re-int]' denotes a range state where the species has been re-introduced.

Other information

The three columns headed CITES, EC Reg. and RL, list the following information for each taxon.

CITES

I, II or III, referring to the CITES Appendix on which the taxon is listed as at 16 February 1995. The letters (eq) after an Appendix II entry denote that the population is on Appendix II subject to an export quota. The letters following Appendix III entries denote the country whose government placed the taxon in this category, as follows: GH, Ghana; HN, Honduras; IN, India.

EC Reg.

The letters in this column refer to the Annex of EC Regulation 338/97 in which the taxon is listed.

RL

Threat categories follow those given in the *IUCN Red List 2000* and are as follows:

EX Extinct
EW Extinct in the Wild
CR Critically Endangered
EN Endangered
VU Vulnerable
LR Lower Risk
LR/cd Lower Risk/Conservation
dependent
LR/nt Lower Risk/Near threatened
LR/lc Lower Risk/Least concern
DD Data Deficient
NE Not Evaluated

No Red List category is given in those few instances where a particular subspecies appears in the IUCN Red List but not the species as a whole

Dependent territories

In the text, parent countries of island groups or dependent territories are omitted. These are listed below:

American Samoa, USA	Jersey, United Kingdom
Anguilla, United Kingdom	Johnston Atoll, USA
Aruba, Netherlands	Macao, Portugal
Ascension Islands, United Kingdom	Macquarie Island, Australia
Azores, Portugal	Madeira, Portugal
Bermuda, United Kingdom	Marshall Islands, USA
Bouvet Island, Norway	Martinique, France
British Antarctic Territory, United Kingdom	Mayotte, France
British Indian Ocean Territory, United Kingdom	Montserrat, United Kingdom
British Virgin Islands, United Kingdom	Netherlands Antilles, Netherlands
Canary Islands, Spain	New Caledonia, France
Canton and Enderbury Islands, Kiribati	Niue, New Zealand
Cayman Islands, United Kingdom	Norfolk Island, Australia
Channel Islands, United Kingdom	Northern Marianas, USA
Christmas Island, Australia	Palau, USA
Cocos (Keeling) Islands, Australia	Panama Canal Zone, USA
Cook Islands, New Zealand	Pitcairn Islands, United Kingdom
Falkland Islands, United Kingdom	Puerto Rico, USA
Faeroe Islands, Denmark	Queen Maud Land, Norway
Federated States of Micronesia, USA	Réunion, France
French Guiana, France	Saint Helena, United Kingdom
French Polynesia, France	Saint Pierre and Miquelon, France
French Southern and Antarctic Territories, France	Saint Vincent, United Kingdom
Gibraltar, United Kingdom	South Orkney Islands, United Kingdom
Greenland, Denmark	South Sandwich Islands, United Kingdom
Guadeloupe, France	South Georgia, United Kingdom
Guam, USA	South Shetland Islands, United Kingdom
Guernsey, United Kingdom	Svalbard and Jan Mayen Islands, Norway
Hawaiian Islands, USA	Tokelau, New Zealand
Heard and Macdonald Islands, Australia	Tristan da Cunha Islands, United Kingdom
Isle of Man, United Kingdom	Turks and Caicos Islands, United Kingdom
	Virgin Islands of the United States, USA
	Wallis and Futuna, France
